

# Homework sheet (4-7s)

Can you remember what you learnt in the game?  
See if you can answer these questions correctly!

Name: \_\_\_\_\_

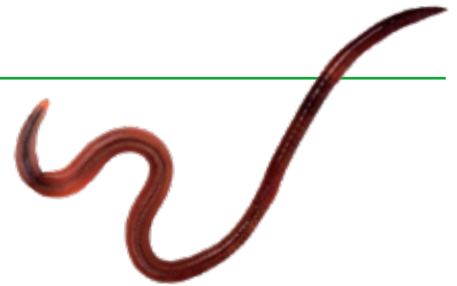

Finish these sentences about the bugs you collected in the game

**Woodlice** have ..... pairs of legs, .....  
long antennae and a hard shell.

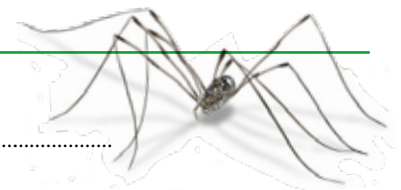

**Worms** don't have any .....

Their muscles contract and expand to move.

You can identify an **earwig** by its long .....

Harvestmen look like **spiders**, but without a .....

**Snails** are recognisable by their hard .....

**Maggots** are larvae and will eventually turn into .....

## What did you learn about living things and the environment?

These **six questions** appeared in the game – can you get them right?  
Circle the correct answer.

1) What do most plants need to grow?

- a) Sunlight
- b) A dark place
- c) Cold weather

2) A habitat is what?

- a) A shop where animals go to buy food
- b) A place where animals and plants live
- c) An animal family

3) Which of these is most likely to grow in a woodland habitat?

- a) An oak tree
- b) Seaweed
- c) A water lily

4) Humans, lions and bears are all types of what?

- a) Mammal
- b) Reptile
- c) Amphibian

5) A predator is an animal that does what?

- a) Only eats green plants
- b) Hunts and eats other animals
- c) Has lots of friends

6) Why do humans need plants to survive?

- a) So we can have parks and gardens
- b) They look pretty
- c) They give us oxygen to breathe and food to eat

# Answer sheet (4-7s)

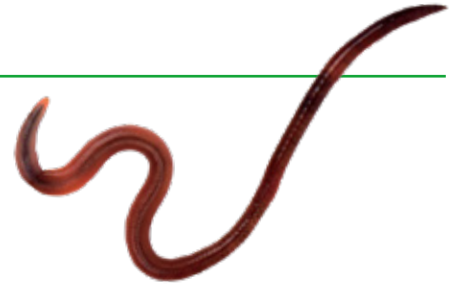

For teachers

Finish these sentences about the bugs you collected in the game

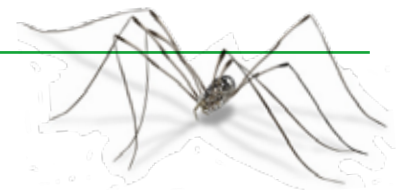

**Woodlice** have **7** pairs of legs, **2** long antennae and a hard shell.

**Worms** don't have any **legs**. Their muscles contract and expand to move.

You can identify an **earwig** by its long **pincers**.

**Harvestmen** look like spiders, but without a **head**.

**Snails** are recognisable by their hard **shell**.

**Maggots** are larvae and will eventually turn into **flies**.

## What did you learn about living things and the environment?

1) What do most plants need to grow?

- a) Sunlight
- b) A dark place
- c) Cold weather

*Plants make their own food by combining a gas called carbon dioxide from the air with water from the soil. To power the process, the plant uses energy from the sun.*

2) A habitat is what?

- a) A shop where animals go to buy food
- b) A place where animals and plants live
- c) An animal family

*Deserts, oceans and forests are all different types of habitat.*

3) Which of these is most likely to grow in a woodland habitat?

- a) An oak tree
- b) Seaweed
- c) A water lily

*You would find seaweed on a seashore and a water lily in a pond habitat.*

4) Humans, lions and bears are all types of what?

- a) Mammal
- b) Reptile
- c) Amphibian

*All mammals have fur or hair, and give birth to live babies which feed on their mothers' milk.*

5) A predator is an animal that does what?

- a) Only eats green plants
- b) Hunts and eats other animals
- c) Has lots of friends

*Predators are carnivores, so they need meat to survive.*

6) Why do humans need plants to survive?

- a) So we can have parks and gardens
- b) They look pretty
- c) They give us oxygen to breathe and food to eat

*Plants create oxygen when they make their own food. We can also eat many plants.*
